**Time Insurance Agency presents a payroll solution! We have endorsed and partnered with multiple payroll companies and professional employer organizations, as they offer solutions designed to reduce costs and simplify the process of producing your payroll.**

## **Payroll Includes:**

### **Online Payroll**

Time Insurance Agency's Payroll Solution is designed to simplify the payroll process without having to sacrifice functionality. With 24 hour access and real-time payroll reporting Time Insurance Agency's Payroll Solution partners offer flexibility and functionality to meet the demands of today's businesses.

### **Complete tax service**

Payroll taxes can be confusing and time consuming. Time Insurance Agency's payroll partners will ease your burden by filing, processing, and making the deposits for your Federal, State, and most local taxes. We will also provide you with copies of quarterly returns and year end unemployment reconciliation.

### **Workers' Compensation**

Workers' Compensation can be a time consuming, costly, and complicated process for employers. Traditional premium payments are based on estimated payroll figures broken down by class code and are usually audited annually causing time consuming manual administration. Not to mention most Workers' Compensation carriers require 15 to 100% of premium up front. With many of our partners offering pay as you go options premium payments are based on real not estimated payroll figures. Premiums are paid concurrent with your pay frequency schedule which eliminates the need for large up front down payments. This removes the financial burden, improves company's cash flow, and eliminates the frustration with managing workers' compensation policies and payments.
